## Education Corner Article

An article on the 2018 NSF IUSE-funded BioMolViz workshops was featured in the PDB Newsletter this quarter. Click anywhere within this box to read the article.

## University of Delaware BioMolViz Workshop, January 2019

**Top:** The working group  
**Bottom:** Workshop leader Rebecca Roberts (Ursinus College) directs participants revising assessments from prior workshops

The final workshop funded by our current IUSE grant took place at the University of Delaware in January. Assessments created in the 2018 workshops underwent further curation to prepare them for integration into an online repository. Participants revised and finalized images, worked on question clarity, and created grading rubrics.

Discussions about establishing an online workflow were a focus, and participants provided valuable feedback on how to maximize progress made in workshops. Special thanks to our host, Jackie Fajardo, for a productive weekend of networking and collaboration with visualization enthusiasts.

## BioMolViz on LinkedIn

We recently created a LinkedIn group for the broader community to connect with BioMolViz and be informed of initiatives, workshops, and events. Click anywhere within this box to connect with BioMolViz through our LinkedIn group.

## ASBMB 2019

The BioMolViz group will be presenting a poster and a talk at ASBMB 2019 on Sunday, April 7th: "Crowdsourcing the Development of Assessments for Biomolecular Visual Literacy." We'll be discussing the workshop outcomes and presenting some of the finalized assessments. Please consider visiting our poster or attending our talk. We look forward to reconnecting with you in Orlando.

## Remote Repository Building

Interested in contributing to the BioMolViz repository outside of workshops?

We're working to develop an online workflow for assessment submission, review and revision. If you'd be interested in helping with this initiative, send us an email at [info@biomolviz.org](mailto:info@biomolviz.org). We'd appreciate your help!
